

# VICRILA COLLECTION 2022

**132**  
years  
of Glassmaking  
Excellence

## OUR HISTORY

-  1890 Vicrla began in 1890 as carafes manufacturer
-  1895 Vicrla production was based on flat glass
-  1901 The company merges with "La Jerezana" bottle factory
-  1925 The "Cía General de Vidrieras Españolas, S.A." company is created
-  1954 New furnace with more than 120 Tm per day
-  1963 The Fuel oil is used as fuel in the company
-  1971 The company started the manufacturing of glassware
-  1980 The company was bought by ARC
-  1990 Change from fuel oil to ecological fuels
-  2009 ARC sold the company to the Spanish Board of Directors
-  2018 Vicrla Industrias del Vidrio, S.L.U. is incorporated with 100% local share capital
-  2022 Looking into the future

WE LOOK  
FOR THE FUTURE

## OUR COMMITMENT

Environmental aspects have been part of the **VICRILA** concept since its inception.

We have a base of **active commitment, therefore**, we work in the **optimization** of the use of **natural resources, energies and materials**, which intervene in the processes of the activity of **VICRILA**, and in the **minimization** in the **waste and emissions** that are generated, existing the corresponding associated management.

**VICRILA** is aware that the best waste is the one that is not generated. And if it is generated, it must be managed in the most sustainable way possible, following European waste management regulations.

All the paper and cardboard we use to package our articles is **100% recycled and free of heavy metals**, not posing any problem for subsequent recycling.

In **VICRILA** we carry out concrete actions on a continuous basis. We have a **strong commitment to create the smallest environmental footprint**. We have Integrated Environmental Authorization and we are certified in:

**ISO 14001** indicates that **VICRILA** integrates in its processes and way of working mechanisms to protect the environment by preventing or mitigating adverse environmental impacts.

**ISO 50001** guarantees that **VICRILA** has a real and serious commitment to the environment thanks to the constant improvement in its energy performance.

**ISO 9001** ensures **adequate quality management** in the organisation, and that our work processes and relations with our customers are **clearly oriented towards satisfaction** and process management.

# MANUFACTURING EXCELLENCE

## WHAT IS TEMPERED GLASSWARE?

Tempering is a thermal process of heating a glass close to melting point then cooling it rapidly. This causes the outer surface of the glass to cool and shrink faster than the inside of the glass wall creating a tight skin. This closes the many hairline fractures that naturally occur in regular annealed glass and make a vastly stronger product.

## HOW STRONGER IS TEMPERED GLASS?

Tempered glass is 5 times stronger. This is known as Mechanical Shock Resistance, making a cost effective choice.

## IS TEMPERED GLASSWARE MORE RESISTANT TO TEMPERATURE CHANGES?

Fully tempered items are thermal shock resistant up to 135°C. This is tested by taking an item of glass from an oven heated to 135°C and then plunging it into cold water. The glassware will not shatter or break.

## IS TEMPERED GLASS SAFER?

Should a glass break due to an excessive blow it will break into smaller pieces than an annealed glass, making it safer to use within the hospitality industry.

## DO I HAVE TO USE TEMPERED GLASS?

By different region the local licencing authority will be able to advise you of this.

## HOW CAN I TELL IF MY GLASSWARE IS TEMPERED?

Vicrilis marks the glass with a on each tempered item.

## RIM TO FOOT TEMPERED "T"

Fully tempered glasses are resistant to mechanical shocks, extending the life of the product up to five times, compared with annealed glass ranges.

## THERMAL RESISTANCE

Thermal shock tested and resistant to 135°C and can withstand changes in temperature from hot to cold.

## LINED, CE MEASURE (LCE) & UKCA

VICRILA is officially certified by the APCER and NMO.

## DISHWASHER & MICROWARE SAFE

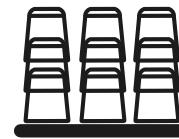

Strong and durable, shock tested and capable of industrial dishwasher cycles, while maintaining clarity.

## SAFETY

Should a glass break due to an excessive blow, a tempered glass will break into small pieces than an annealed glass.

#### MORE SPACE

By stacking you can minimise the space and gain amplitude in your business

#### STACKABLE

You can distinguish which of our articles are stackable with this symbol.

FULLY  
TEMPERED  
UP TO 5 USEFUL LIFE

#### TEMPERED

Our stackable items are also tempered to prevent breakage due to mechanical shock.

# STACKABILITY IS OUR STRENGTH

#### WHAT IS STACKABILITY?

Stackability is the ability to be stacked. This means that items that are stackable can be stacked on top of each other without the risk of being jammed or falling over.

#### ARE ALL ITEMS STACKABLE?

All items with are stackable.

#### WHAT ARE THE ADVANTAGES OF STACKABILITY?

Stackable items allow you to save a lot of space. You can store more items safely and securely and gain in space and storage capacity.

STACKABLE

NO STACKABLE

Elytium by  
**VICRILA**

**VICRILA** has adopted the latest technology of cut glass that allows a pure and clean cut without edges at the mouth of the article. This cut is obtained by a process of thermal shock called "crack-off" that allows a controlled circular fracture of the upper part of the article, giving the mouth the required fine appearance; that is why, the range of tempered sheer rim table glass called **ELYTIUM** lets us appreciate the main organoleptic attributes.
